

Treegator - 20 gal Each

R8180

Details

Promote a healthy deep root system for newly transplanted trees and reduce transplant shock with Treegator 20 gallon drip irrigation bags. Essential on existing trees during summer drought conditions when extra hydration is needed. Simply zip bag around tree, fill with water and forget it! So easy! Water is slowly metered up to 10 hours to allow 100% absorption to the root zone. Eliminates hose watering and costly water runoff on uneven ground. Zip bags together for larger trees. Use one bag (20 gal.) for 1" - 4" trunk. Zip two bags together (50 gal.) for 5" to 8" trunk. Reusable. 20 gal. each. Green.

Specifications

Manufacturer	TreeGator
Capacity	20 gal
Color	Green
