

Edgit Pro - to Fit Echo High Torque Trimmers

RED1002

Details

The Edgit Pro High Torque is a trimming and edging guide for Echo straight shaft high torque trimmers with a "T" in the model number. The 14" disk rolls down the edge like a measuring wheel, guiding the string as it cuts a half-inch wide groove, producing perfect vertical edges on mulch beds, curbs and sidewalks, as fast as you can walk. Hold the trimmer level and use it as a mower deck. Use it to trim and mow bunker faces, plus edge sand traps, paved cart paths, sidewalks, curbs and mulched beds. Use on straight shaft trimmers, only. Diameter 14".
