

Underhill BIO-90 - 90% Spreader-Activator/Nonionic Surfactant - 1 Qt. Jug

RGBI901Q

Details

Bio-90 is used when accompanying pesticide label instructions recommend the use of a non-ionic surfactant tank mix adjuvant. Use when you need to optimize the performance of turf fungicides, insecticides and herbicides and when uniform spray coverage and penetration into the targeted plant surface is preferred. Bio-90 contains an antifoam ingredient to suppress troublesome foam during agitation and along with a rainfast ingredient to minimize wash-off. Use 32 oz (946 ml) per 100 gallons (378.5 L) of spray water to ensure spreading and penetration of active ingredient for enhanced uptake. 1 Qt / 946ml Jug.

Specifications

Manufacturer	Underhill
Manufacturer's	BI901Q
Model No	
Container Size	1 qt
