

# Alloy Hollow Tine - .750MT x 5.500L x .630OD R201587

## Details

Like Standard Hollow Tines, this tine is also tubular and designed to remove a soil core, but they are constructed from a special high carbon alloy steel. The steel tubing is specially manufactured for R&R to achieve uniform hardness of RC45-48 throughout the tine for excellent wear and toughness. These tines are much tougher and resist bending in extremely hard or rocky soils and you can expect 3-4 times longer life than from the Standard Hollow Tines.
