

Spoton Digital Soil Compaction Tester/Penetrator

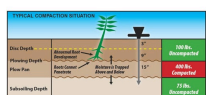

RTT1018

Details

Test for hard pans in the soil. This digital tester uses an electronic force sensor that eliminates changing tip size for different soil types. With steady downward pressure, you can visually see any hard pans in the soil profile up to 24" (60 cm) deep. The LCD display reads the maximum PSI or kPa, plus shows compaction severity with a green/yellow/red color code. Rugged construction. Meets ASABE S313.3 Soil Compaction Standard.

- Able to test for hard pans in the soil
- Visually see any hard pans in the soil profile up to 24" (60 cm) deep
- Electronic force sensor eliminates changing tip size in different soil types
- LCD display reads the max PSI or kPa
- Shows compaction severity with a green/yellow/red color code
- Heavy duty construction
- Meets ASABE S313.3 Soil Compaction Standard
