

Mechanix Wear Wind Resistant Gloves

R7048-

Details

When the weather gets cold and the thermometer dips below 40 degrees Fahrenheit, you need a glove to withstand the elements. Wind Resistant Gloves are a combination of soft and comfortable heavyweight fleece, 3M Thinsulate wind resistant lining, and a super-snug fit to create an impenetrable barrier between your hands and the cold. Add strategically placed Sure-Grip panels and rubberized palm material to make this an essential glove for cold and damp conditions.

- Heavy-weight fleece top
- Rubberized high-grip palm
