22	R262		Bearing Puller - Fits Groomer Roller	1	

Tech Note: Excellent tool to quickly remove bearings and shafts from R390899 and R390900 groomer rollers. Puller Fits Jacobsen & R&R 2-1/2" Groomer Rollers:

Detail Description: R&R Products developed a special line of tools to remove tapered bearing races from rollers, gear boxes and the outer ball bearing races left inside roller ends, in case of a catastrophic bearing failure. The R&R Puller contains a mandrel and spreader which secures behind the tapered bearing race or to the inside ball bearing groove. The tube assembly, which contains its own tapered bearing pulling system, is then placed over the mandrel and spreader to easily remove the outer race. Mandrels and spreaders are manufactured by R&R Products from high carbon chromium vanadium steel and heat treated for maximum strength.:

23 R554571	554571	Bearing	2
24 R338485	338485	Roller Tube Only - Grooved Machined Aluminum	1
25 R338519	338519	Groomer Roller - Grooved Machined Aluminum	1
